

The above photo shows the Tender arriving at the Mizens Railway and passing our Dubs Tank locomotive by the gate. At first the weather for the unloading was fine but it turned against us after lunch and a severe cloudburst delayed our progress. Eventually the tender was successfully rolled off the ramp at around three o'clock in the afternoon to cheers from the small crowd that had gathered.

On the publicity front, Manchester United FC were kind enough to feature us in the Match Programme for their game against Chelsea on 5th May and this has resulted in the number of 'hits' on our project website : www.engine61662appeal.co.uk climbing past the 10,000 mark. We just need to translate this interest into Loco Shares and the new engine will be well on its way ! Facebook users please note that during the first week of June we established a 'facebook page' for the project titled : **Engine 61662 'Manchester United'**. - if you get the chance, please 'like' this page to help us become established and attract further support.
